Overview

Versatile software engineer seeking a technically demanding role on a team valuing craft and collaboration.

Professional Experience

Software Engineer; Square, Inc. (Caviar organization); Apr 2018 – present

Responsible for entire lifecycle of business-critical projects, including: adjusting scheduling software to improve compliance with California labor laws, integrating Zesty's logistics software with Caviar's courier-dispatching service to increase labor supply, and establishing a message queueing architecture to support a new Rails service.

Teach team members how to build with Ember.js and Apache Cordova; organized organization-wide and company-wide meetings to share knowledge of recent changes to Ember framework; responsible for maintenance of dependencies for team's many Ember applications.

Established team processes to improve shared technical understanding of upcoming projects

Software Engineer; Zesty, Inc. (acquired by Square); Apr 2016 – Apr 2018

Led development and planning of software to support a new snacks product; constructed roadmap for integration of the product with the existing infrastructure

Worked directly with internal and external stakeholders to improve restaurant ordering, restaurant account management, meal curation, and timekeeping/payroll management when transitioning catering team from contractors to employees.

Skills

Ruby, JavaScript, Python, Ruby on Rails, Ember.js, React.js, Vue.js, Test-Driven Development, Object-Oriented Programming

Education

BA Physics, Reed College, 3.68 GPA
